T.I.G.

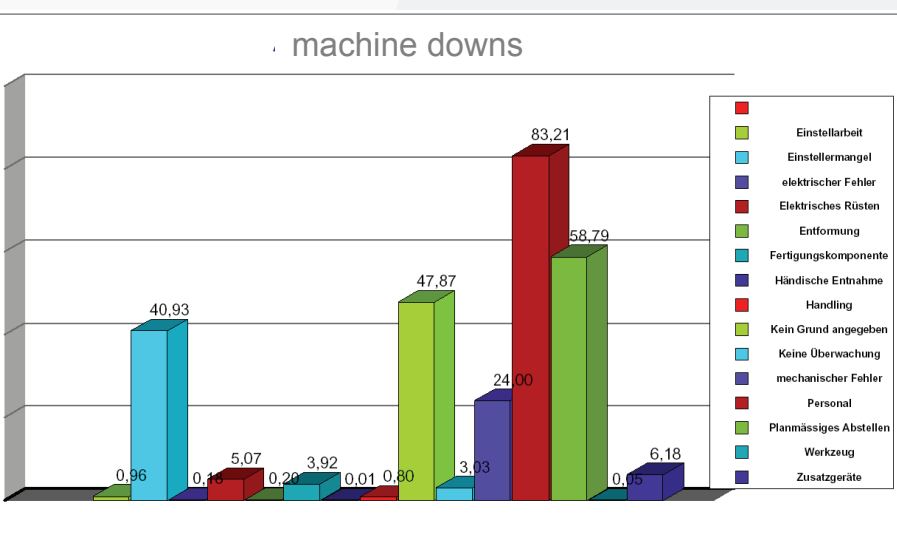

Productivity chart

Our concept:

The **T.I.G. ■ REPORTING ASSISTANT** is a powerful tool to create customer-specific reports on the basis of the operation, production, and process data acquired.

The **T.I.G. ■ REPORTING ASSISTANT** contains a great number of pre-defined reports. Generate a variety of reports in the form of charts or lists either in manual or fully automatic mode.

Downtime chart

Application:

Find out about the productivity of your machinery over a particular month, quarter or year. Identify problematic moulds.

The **T.I.G. ■ REPORTING ASSISTANT** will create reports of all your production areas.

Retrieve information concerning productivity, order statistics, shift and monthly statistics, setup and working papers, as well as quality reports.

You may call the **T.I.G. ■ REPORTING ASSISTANT** the centre piece of the entire system for the decision maker. Providing – at the push of a button – all the information relevant in day-to-day business and for making important decisions quickly. The economy of a machine should not be determined by speculation!

T.I.G. ■ REPORTING ASSISTANT

... first things first – at the push of a button!

Get all the information you can instead of burning money

Technological aspects:

Define your specific parameters for the **T.I.G. ■ REPORTING ASSISTANT** to compute productivity, provide order statistics, shift and monthly statistics, and create setup and working papers, as well as quality reports.

Right from installation there is a great number of standardised reports available. Modify and adapt any reports yourself by means of the reporting tool "Crystal Reports".

Export your reports to next to any other program for further processing. The **T.I.G. ■ REPORTING ASSISTANT** supports the export of reports into Excel, Word, QS-Stat, statistics software, Access, or simple ASCII files at any time!

Higher productivity = more profit

Your benefit:

- Highly valuable tool for making decisions on how to invest - based on facts and current information.
- Creation of reports, statistics, and production papers with great comfort and ease.
- Automatic generation of setup and production papers as well as every-day reports.
- Shift and/or daily statistics ready for collection in the foreman's office printer every morning.
- Generation and printing of waybills, packaging labels, or bar codes if so required.
- Uninterrupted, current, and comprehensive information concerning your production.
